TRUTH ABOUT GARLIC

With quite astonishing consistency the virtues of that homely herb Garlic have resounded through the annals of the ages. They were known to the Egyptians 5,500 years ago; in the Hindoo writings of 3,000 years ago; in a Sanscrit treatise of 2,500 years ago; in the writings of Pliny 2,000 years ago; in a mediæval treatise of Salerno 800 years ago; in a notable medical work published in London 300 years ago.

GARLIC GAVE BEST RESULTS

In the present century, according to Dr. M. W. McDuffie, of the Metropolitan Hospital of New York, after testing fifty-six treatments:

> " Garlic contains a volatile oil, called Allyl Sulphide, and its medical properties depend on this oil, strongly antiseptic, and it seems to have a remarkable power of inhibiting the growth of the . . . bacillus, eliminated by the lungs, skin, kidneys and liver, and oxydises into sulphuric acid in the system. Applied locally it is freely absorbed by the skin and penetrates the deeper tissues. Garlic gave us our best results, and would seem equally efficacious, no matter what part of the body affected, whether skin, bones, glands, lungs or special parts."

If garlic is not a universal remedy and a renewer of health and youth, it appears at least to come nearer to that dream than any known thing given by nature for the use of man. Nor is there anything specially magical about this—certainly nothing to strain the reasonable powers of belief. It is all quite simple and entirely natural. Consider a homely example. Most of us who have lived through the austerities of spring cleaning know

the old recipe of half an onion left in a newly-painted room. This originates in the common knowledge that a raw onion cleanses the air around it by attracting into itself any impurity. There are grimly picturesque stories from the seventeenth century about the great plague of London. They tell of whole households saved from the scourge by the good offices of garlic —which contains the same basic properties as the onion but in a very much stronger form. Oil of garlic, in fact, is a natural and very potent disinfecting medium.

There was one bad snag about this question of internal disinfection. In dealing with your body you are dealing with human tissues. When you are dealing with drains and dustbins, you are not. You may cope with these inanimate conduits and vessels quite successfully by tipping down carbolic acid and chlorides. But you can't do that to your own internal pipes and ducts without poisoning, blistering and burning up your organic tissues.

What is necessary for effective internal use is a detoxicant which does not destroy the vital tissues and natural secretions of the body and whose purifying function is not in turn destroyed by them.

Garlic—that immemorial remedy of nature—does contain a natural oil that is not only powerfully detoxicant but can be used within as well as without. Not only does it detoxicate the system; it exercises a positive action in toning the lymphatic cells and purifying the blood stream and intestines. It is the lymph surrounding every cell that is the favourite lurking place for waste matter and irritants. Oil of garlic penetrates the lymphatic fluid, breaks up toxic accumulation and passes it out of the body by way of the blood stream through pores, kidneys and intestines.

But in its unrefined state, the oil contains a somewhat harsh irritant which makes it unsuitable for prolonged or intensive treatment. It possesses also a pungent and persistent smell which transmits itself to the breath and even to the perspiration.

These objectionable properties belong chiefly to resins contained in the oil. If they could be removed there would remain a detoxicant of vegetable origin, non-poisonous, non-caustic and non-irritant; capable of inhibiting infection, liquidating catarrh, and reducing inflammatory conditions; a natural cleanser of the human system, neutralising septic conditions wherever found and increasing resistance to disease.

Notwithstanding sensational new drug and serum discoveries, the truth about garlic stands unchallenged as it has stood for 5,000 years.

Its benefits are available to all, because the difficulty of taking raw garlic in quantity and frequency sufficient for remedial as distinct from culinary purposes has been overcome in **GARLISOL** deodorised garlic remedies, described in the following pages.

GARLISOL is used internally and externally; for oral dosage, for the rectal and vaginal enema, for compresses, and as liniment.

GET TO KNOW
GARLISOL

Purifying and Healing Liquid, Tablets, Ointment and Rheumatic Balm

GARLISOL preserves the healing and purifying powers of garlic in deodorised and deodorant forms. The irritant resin is removed and the benefits of garlic can be obtained without embarrassment, with absolute confidence and convenience.

GARLISOL IMPARTS NO SMELL TO THE BREATH OR PERSON.

GARLISOL is intensely penetrative. Whether used internally or externally—or both, which is best—it diffuses throughout the system, purifying the blood and lymph, and assisting the elimination of toxic wastes, which are at the root of rheumatism, catarrh and many irksome ailments.

It has a profound effect on all infection, ulcers, virulent sores, destroys all foul odours of the body.

It disinfects the entire system: stomach, intestines, lungs, bladder, liver, kidneys, eyes, brain, heart, arteries, veins, blood, flesh and bones.

GARLISOL is not a drug, stimulant, purgative, nerve restorer or food. It is purely a detoxicant and healer.

And there is none better in the World.

GARLISOL (new name for ALLYSOL) powerfully reinforces Nature's urge towards self-healing, and makes possible a radical and positive scheme of health reform.

GARLISOL is generally compatible with herbal and bio-chemic medicines, but it is not compatible with certain drugs. Before taking any allopathic medicines containing iron salts, alkaline potassium salts or alkaline soda salts, an interval of two hours should be left **after** taking the Garlisol. No adverse reaction would occur, but the medicinal value of both would be lost in combination. Mercurial salts should never be taken concurrently with Garlisol.

RHEUMATISM is one of those debilitating ailments which spring from inner impurities. It cannot be permanently remedied by superficial or artificial means. Mere suppression of local pain may leave the cause untouched, or even aggravate it. Lasting relief will come only from tackling the **causes**, by dissolving the impurities at their root.

CATARRH, the commonest of all disease conditions, is rooted in a toxic state of the system. The remedy lies in purifying the system thoroughly, and by reform of the diet. Purification is the first step in the dissolution and elimination of catarrh.

Chronic catarrh is commonly treated with drugs, inhalants, gargles, sprays, cauterisation and even surgery. But withal, the condition—particularly as catarrhal deafness—remains: the implacable enemy of fitness, activity, happiness and mental efficiency. In the dissolution of catarrh GARLISOL is most highly effective, clearing the system of stored irritants which are the cause of local trouble.

GARLISOL OINTMENT

GARLISOL combines with the self-protective energies inherent in all the cells of which the body consists. By cleansing the blood and the fluid in which the cells live, it powerfully assists true healing.

Since GARLISOL OINTMENT deeply penetrates the skin, it brings this superb purifier into the tissues beneath. Its application is therefore of sure efficacy in a great many disorders affecting the skin—for example Eczema, Chilblains, Rashes—but also in many other ailments rooted in toxic conditions. And, because of its power to promote true healing, it is of everyday practical importance in the home, the factory, the office. Every first-aid box should contain it. The ideal baby ointment.

RHEUMATISM

It is rarely that rheumatic pains are not rooted in toxic conditions in the muscles, tendons or joints. On the physiological principle of assisting the body's healing energies, GARLISOL OINTMENT or Rheumatic Balm, especially when used concurrently with GARLISOL LIQUID or TABLETS, disperses or neutralises the cause and therefore gets results every time

SCIATICA

Alongside the pressure on the sciatic nerve that is often one of the causes of this distressing ailment there is invariably an irritating toxic condition both of the painful area and of the blood and lymph generally. GARLISOL OINTMENT in conjunction with GARLISOL LIQUID and TABLETS is the completely rational detoxicating treatment, for reasons already stated.

NEURITIS

An inflamed condition of nerves means that something is irritating those sensitive living threads. That something must be foreign to the body, and the most direct and sensible way to remove the hidden enemy is the GARLISOL combination of Ointment, Liquid and Tablets. Relief is rapid.

Boils, Burns, Cuts, CHILBLAINS, ECZEMA, Infant Eczema, Gathered Toes, Mosquito Bites, PILES, Psoriasis, Scalds, Stings, Scabies, Sunburn, Septic Wounds, Whitlows—IN ALL THESE GARLISOL OINTMENT promotes TRUE HEALING.
